ABSTRACT

This report is based on information from the 1991-92 "Public Elementary and Secondary School Universe" and the "Public Elementary and Secondary Education Agency Universe" surveys of education in the United States. These are two of the surveys of the Common Core of Data collected annually by the U.S. Department of Education's National Center for Education Statistics. Nineteen tables summarize statistical information for each school and education agency as supplied by state education agency officials. The 84,578 public schools represent a slight increase over the number for the previous school year. The average student body size of public schools of 522 in 1991-92 was slightly larger than that of 1990-91, with high schools generally larger than elementary schools. The median pupil-teacher ratio in 1991-92 was 18.3 students for each teacher in elementary schools, 17.0 students for each teacher in middle schools, and 15.4 students for each teacher in high schools. The number of school districts declined slightly to 15,173. The 1.2 percent of school districts in the largest size range (25,000 or more students) served some 29.1 percent of the nation's public school students. Two appendixes contain sample survey forms for the school and agency surveys. The text also contains information on survey methodology and definitions and abbreviations. (SLD)

Highlights

This report is based on information from the 1991-92 **"Public Elementary and Secondary School Universe"** and the **"Public Elementary and Secondary Education Agency Universe"** surveys of education in the United States. These data represent two of the surveys from the Common Core of Data (CCD) collected annually by the U.S. Department of Education's National Center for Education Statistics (NCES). The tables in this report summarize statistical information for each school and education agency as supplied to NCES by state education agency officials.

School and Student Information

- The 84,578 public schools reported for 1991-92 represent a slight increase over the 84,538 public schools reported for the previous school year. Among the 1991-92 schools, 79,876 (94.4%) were regular schools while 4,702 (5.6%) offered primarily special education, vocational education or some other alternative program (Table 1).

- The average student body size of public schools was 522 pupils in 1991-92 (compared to 509 in 1990-91). Students in 1991-92 were most likely to be educated in schools with a membership of 300 to 749 pupils, but 0.9 percent of the students were served by schools of fewer than 100 students and 10.4 percent were served in schools with 1,500 or more students. Average school size differed by grade range: 447 students for primary schools; 576 students in middle schools; and 714 students in high schools (Tables 3, 5, and 9).

- The total of 42,000,343 public school students reported for 1991-92 is 1.9 percent greater than the 41,223,804 in membership in 1990-91. In 1991-92, 56.5 percent of the students were enrolled in prekindergarten through grade 6; 22.6 percent were in grades 7 through 9; 19.0 percent in grades 10 through 12; and 1.9 percent were in ungraded settings (Table 6).

- The median pupil-teacher ratio across public schools in 1991-92 was 18.3 students for every teacher in primary grades. For middle schools, the median pupil-teacher ratio was 17.0, and it was 15.4 for high schools (Table 10).

School Districts

- The number of regular school districts changed from 15,358 in 1990-91 to 15,173 in 1991-92. Although only 1.2 percent of the districts were in the largest size ranges (membership of 25,000 or more), these districts served some 29.1 percent of the nation's public school students. The average school district enrolled 2,818 students (Tables 15 and 19).

Tables

1. Number and percentage of public elementary and secondary schools, by type of schools, and by state: School year 1991-92 6

2. Number and percentage distribution of students in public elementary and secondary schools, by type of school, and by state: School year 1991-92 7

3. Number and distribution of regular public elementary and secondary schools with student membership, by membership size, and by state: School year 1991-92 8

4. Number and percentage distribution of public elementary and secondary schools, by school-size category, and by state: School year 1991-92 9

5. Number and percentage distribution of public elementary and secondary students, by school-size category, and by state: School year 1991-92 10

6. Number and percentage distribution of students in public elementary and secondary schools, by grade ranges, and by state: School year 1991-92 11

7. Number and percentage distribution of public elementary and secondary schools providing instruction, by specified grade span, and by state: School year 1991-92 12

8. Number of public elementary and secondary schools of specified instructional levels, by state: School year 1991-92 13

9. Mean number of students per school in public elementary and secondary schools of specified instructional levels, by state: School year 1991-92 14

10. Median pupil-teacher ratios in public elementary and secondary schools with student membership of specified instructional levels, by state: School year 1991-92 15

11. Selected characteristics of public elementary and secondary school membership as percentage of school membership and percentage of schools for which characteristic is reported, by state: School year 1991-92 16

12. Number of public elementary and secondary schools, by type of locale codes, and by state: School year 1991-92 17

13. Number of public elementary and secondary students, by type of locale codes, and by state: School year 1991-92 18

14. Number and percentage of public elementary and secondary education agencies, by type of agency, and by state: School year 1991-92 19

15. Distribution of regular public elementary and secondary school districts and students, by district membership size: School year 1991-92 20

16. Number of regular public elementary and secondary school districts, by grade span, and by membership size: School year 1991-92 20

17. Number of regular public elementary and secondary school districts, by grade span, and by state: School year 1991-92 21

18. Number of regular public elementary and secondary school districts, by membership size, and by state: School year 1991-92 22

19. Distribution of regular public elementary and secondary school districts with student membership, by membership size, and by state: School year 1991-92 24

Appendices

A. Sample Survey Form (School Universe) 26
B. Sample Survey Form (Education Agency Universe) 27

Introduction

The sources of data for this report are the **"Public Elementary and Secondary School Universe"** and the **"Public Elementary and Secondary Education Agency Universe."** Data for this report were provided by state education agencies from administrative records in their offices. Responses to these surveys were received by NCES from state education agencies in the spring and summer of 1992. The data used here represent information incorporated into the files as of January 1993.

NCES and the state education agencies work cooperatively to promote comparability between data elements requested and reported. In December of 1991, school and agency surveys were sent to each state education agency CCD coordinator (sample survey forms are shown in the appendices to this report). Updated reports were returned by the coordinator to NCES, which edited these submissions to identify missing data or what appeared to be unusually large changes from the previous year's values. Edited reports were sent to the states for verification or correction, and the CCD coordinators' responses were incorporated in the final data set. Data from the 50 States, the District of Columbia, and five outlying areas are included. Information from the outlying areas is reported in the tables, but is not reflected in the United States totals.

Methodology

In this report, state totals of student membership are taken from the **"State Nonfiscal Survey,"**while distribution of membership among the various school categories is calculated from individual school records in the **"Public Elementary and Secondary School Universe"** survey. When no students are reported in a specific membership cell, NCES enters a zero in that cell so that mathematical operations can be performed. NCES uses the sum of students by grade (ungraded and prekindergarten through 12) as the official count of students for the school. Virginia provided no report for 1991-92, and student membership counts were imputed for schools in this state using **"State Projections to 1992 for Public Elementary and Secondary Enrollment, Graduates, and Teachers."**

Assigning student counts for reporting purposes. Both the school and agency surveys have legitimate records that include no student counts. Schools offering special programs, such as special or vocational education, often operate as adjuncts to regular schools. In these situations, personnel accounting procedures may call for all students--and, in some cases, teachers--to be attributed to the regular school, with the result that the special school has a count of zero. Some regular school districts contract with other agencies to provide services for some students rather than operate schools for these students directly. In this case, student counts are not reported for the receiving district in order to avoid duplication. Conversely, in cases where all students are served by a receiving district, no student counts are reported for the sending district.

Student counts are also generally not attributed to supervisory union administrative centers or regional education service agencies. Some of the tables in this publication include only records with students reported. And student counts may vary depending upon the survey from which they are reported. For example, state aggregate reports may include students who are not associated with a school district (such as students in some special schools for the handicapped operated directly by the state) and thus are not reflected in the agency totals. Readers should note this when using data from these tables.

Missing data. Missing or unavailable data are represented by the symbol "---"in the tables. Data are shown as missing when they are reported by less than 70 percent of the schools or agencies (whichever is the appropriate reporting unit) in a state. This is the case with two characteristics — the racial/ethnic composition of a school's student membership and the number of students eligible for free lunch services. When a data element is missing for one or more states, national aggregates are not computed. However, in table 10 total median pupil-teacher ratios are computed on reporting states.

Edits to Missing Data

PK-12 membership. Agency and school universe totals for student membership may differ for a given state. Oklahoma did not report membership count at the district level for 1991-92. The numbers shown for Oklahoma were aggregated by NCES using the school universe file. Virginia did not report membership counts in 1991-92. Therefore, the numbers shown were aggregated by NCES using "**State Projections to 1993 for Public Elementary and Secondary Enrollment, Graduates, and Teachers.**" Louisiana excluded special education students in self-contained settings from the PK-12 membership totals.

Ungraded membership. Ungraded classification is not used for students in Alabama, Georgia, Minnesota, Nebraska, North Dakota, South Carolina, and Texas. No ungraded students were reported for Alaska, Delaware, Florida, Northern Marianas, Ohio, and Washington.

FTE teachers. These data were not reported by Masschusetts and Michigan. NCES adjusted reports to show FTE as missing for these school records.

In Colorado some teachers have districtwide responsibilities that are not reported. In order to avoid undercounting of teachers at the agency and state level, these teacher counts were apportioned across the schools within the associated district. California did not collect teacher counts for 1991-92. The numbers included were imputed from the previous year values using "**State Projections to 1992 for Public Elementary and Secondary Enrollment, Graduates, and Teachers.**" The teacher counts were also imputed for Virginia using the same methodology.

Some schools may report teachers but no pupils, while other schools may report pupils in membership but no teacher FTE. These are valid records indicating situations in which more than one school provides services to pupils, but the pupils are attributed to a

single school to avoid double counting; or in which a teacher provides services to pupils at multiple schools.

Free lunch eligible. In some states, a single school may provide the free lunch program for a cluster of schools, and the free lunch eligible count for the school providing services may be overrepresented relative to the school's total membership. In addition, to avoid identifying any student as eligible for free lunch, the maximum number reported has been adjusted to be no more than 95 percent of a school's total membership. This adjustment may represent an undercount of students at the state level. Free lunch eligible counts were reported as missing for Alabama, Arizona, Illinois, Kentucky, Missouri, New Mexico, New York, Pennsylvania, South Dakota, Vermont, and Washington. Virginia did not respond to the 1991-92 CCD. Free lunch eligible is not available for Maine, Massachusetts, and Tennessee because they do not collect this data at the school level.

Membership, by race. These counts may be taken by the schools at a different time than membership counts, so that racial/ethnic status and membership totals may not be the same. Racial/ethnic data were not provided by Georgia, Idaho, Maine, Puerto Rico, South Dakota, Tennessee, or Virginia. Racial/ethnic data were imputed for Tennessee from the previous year's report but shown as "missing" for the other states since no previous data were available.

Locale type. Locale type codes were previously assigned to the 50 States and the District of Columbia only. Presently four of the five outlying areas have a value (ranging from 1-7) for the code. No locale codes have been assigned to Puerto Rico. All other records have a code indicating the location of the school relative to populous areas, based on the school's mailing address.

Education agency type. Agencies classified as supervisory union administrative centers generally do not report student membership. Vermont and Massachusetts are exceptions, and report student membership for such agencies.

Definitions and Abbreviations

Alternative education school--A public elementary/secondary school that addresses needs of students that typically cannot be met in a regular school. It provides nontraditional education and may be adjunct to a regular school.

Education agency--Government agency administratively responsible for providing public elementary or secondary instruction, or both, or educational support services.

Federally operated agency--Any elementary, secondary, or combined education program operated by a federal agency (such as the Bureau of Indian Affairs) reported by the state CCD Coordinator.

FTE (Full-time equivalency)--Amount of time required to perform an assignment stated as a proportion of full-time positions, and computed by dividing the amount of time employed by the time normally required for a full-time position.

Grade span--The grade span indicates the lowest and highest grades served by a school district, as inferred from student membership data for the schools affiliated with the school district.

K--Kindergarten.

Large city--Central city of a metropolitan statistical area (MSA) with a population greater than or equal to 400,000 or a population density greater than or equal to 6,000 people per square mile.

Large town--Town not within an MSA, with a population greater than or equal to 25,000.

Midsize city--Central city of an MSA with a population less than 400,000 and a population density less than 6,000 people per square mile.

Other agency--Any elementary, secondary, or combined education program that cannot be classified appropriately using another CCD designation and that has been reported as such by the state CCD Coordinator. In this report, these programs are grouped with federally operated agencies.

PK--Prekindergarten.

Public school--Institution that provides educational services, has one or more grade groups (PK-12) or is ungraded, has one or more teachers to give instruction, is located in one or more buildings, has an assigned administrator, receives public funds as primary support, and is operated by an education agency.

Public school membership--The unduplicated count of students on the roll of the school or district (excluding any formally enrolled students who withdrew from school), taken on the school day closest to October 1.

Regional education service agencies (RESA)--Agencies that provide special services to other public elementary and secondary education agencies.

Regular school--A public elementary/secondary school that does not focus primarily on vocational, special, or alternative education.

Regular school districts--Agencies responsible for providing free public elementary and secondary education for school-age children residing within their jurisdiction. These agencies sometimes include special and vocational education in a comprehensive educational setting.

Rural--A place with less than 2,500 people and coded rural by the Census Bureau.

School district--Education agency or administrative unit that operates under a public board of education.

Small town--Town not within an MSA and with a population of less than 25,000 and greater than or equal to 2,500 people.

Special education school--Public elementary/secondary school that focuses primarily on special education, including instruction for any of the following: hard of hearing, deaf, speech impaired, health impaired, orthopedically impaired, mentally retarded, seriously emotionally disturbed, multihandicapped, visually handicapped, deaf and blind; and has adapted curriculum, materials, or instruction for students served.

State education agency--The agency of the state charged with primary responsibility for coordinating and supervising public instruction, including the setting of standards for elementary and secondary instruction programs.

State-operated agency--Any elementary, secondary, or combined education program operated by a state agency (such as state schools for the blind or deaf) reported by the state CCD Coordinator.

Supervisory union administrative centers--Agencies that provide administrative services for a group of small school districts.

Urban fringe of large city--Place within an MSA of a large central city and defined as urban by the Census Bureau.

Urban fringe of midsize city--Place within an MSA of a midsize central city and defined as urban by the Census Bureau.

Vocational education school--Public elementary/secondary school that focuses primarily on vocational education, and provides education and training in one or more semiskilled or technical occupations.
